

Table of Contents

Preface	19
Introduction.....	20
1 Scope	21
2 Normative References	21
2.1 Related HART Documents	21
3 Definitions	22
4 Symbols and Abbreviations	25
5 Test Procedures	26
6 Test Configurations	26
7 Test Substitutions	26
8 Test Conditions	27
9 Test Results	27
10 Physical Layer Test Equipment	28
10.1 Test Load Resistor Properties	28
10.2 Oscilloscope	28
10.3 Frequency counter	28
10.4 DC Power Source	29
10.5 PC and Software	29
10.6 PhL Test Interface	29
10.7 High Impedance Current Source	29
10.8 Test Filters	30
10.9 RMS Digital Volt Meter (DVM)	30
10.10 Signal Generator	30
10.11 AC Ammeter	30
11 Physical Device Types	31
12 Device Test Setup	33
12.1 Current Input Device Test Setup	34
12.2 Current Output Device Test Setup	34
12.3 Voltage Input Device Test Setup	35
12.4 Voltage Output Device Test Setup	35
12.5 Secondary Device Test Setup	36
12.6 Transmitter Device Test Setup	36
12.7 Actuator Device Test Setup	38

12.8	Non-DC Isolated Bus Device Test Setup	38
12.9	DC Isolated Bus Device Test Setup	39
13	Physical Layer Tests	40
13.1	Waveshape	41
13.1.1	Requirements	41
13.1.2	Test Equipment	43
13.1.3	Test Setup	43
13.1.4	Test Procedure	43
13.1.5	Notes on Waveshape	44
13.1.6	Example Test Data	45
13.2	Carrier Start/Stop/Decay Timing	46
13.2.1	Requirements	46
13.2.2	Test Equipment	47
13.2.3	Test Setup	48
13.2.4	Test Procedure	48
13.2.5	Notes on Carrier Timing	49
13.2.6	Example Test Data	50
13.3	Carrier Start/Stop Transient	51
13.3.1	Requirements	51
13.3.2	Test Equipment	51
13.3.3	Test Setup	52
13.3.4	Test Procedure	52
13.3.5	Notes on Carrier Start/Stop Transient	53
13.3.6	Example Test Data	53
13.4	Output Noise During Silence	55
13.4.1	Requirements	55
13.4.2	Test Equipment	56
13.4.3	Test Setup	56
13.4.4	Test Procedure	57
13.4.5	Notes on Output Noise During Silence	57
13.4.6	Example Test Data	58
13.5	Analog Rate of Change	59
13.5.1	Requirements	59
13.5.2	Test Equipment	59
13.5.3	Analog Rate of Change Test Setup	60
13.5.4	Test Procedures	61
13.5.5	Notes Regarding Analog Rate of Change	61

13.5.6	Example Test Data	62
13.6	Receive Impedance Measurement	63
13.6.1	Requirements	63
13.6.2	Test Equipment	64
13.6.3	Test Setup	65
13.6.4	Receive Impedance Test Procedure	67
13.6.5	Notes Regarding Receive Impedance Measurement	70
13.6.6	Example Test Data	71
13.7	Send Impedance Measurement	72
13.7.1	Requirements	72
13.7.2	Test Equipment	73
13.7.3	Send Impedance Test Setup	73
13.7.4	Send Impedance Test Procedures	74
13.7.5	Example Test Data, Low Impedance Device	76
13.7.6	Notes Regarding Send Impedance Measurement	76
13.8	Noise Sensitivity Tests	77
13.8.1	Requirements	77
13.8.2	Test Equipment	78
13.8.3	Test Setup	78
13.8.4	Test Procedure for all physical device types	79
13.8.5	Notes Regarding Noise Sensitivity	81
13.9	Carrier Detect Tests	82
13.9.1	Requirements	82
13.9.2	Test Equipment	83
13.9.3	Test Setup	83
13.9.4	Carrier Detect Test Procedure	83
13.9.5	Notes Regarding Carrier Detect	84
Appendix A.	Test Circuits	85
A1.	Simulated Sensor Circuit Suitable for Analog Rate of Change Test	85
A2.	HCF Tools – Filter Characteristics	86
Appendix B.	Bipolar Power Supplies	87
Appendix C.	Test Data Sheets	88
C1.	Physical Layer Test Summary	89
C2.	Waveshape	90
C3.	Carrier Start/Stop/Decay	92
C4.	Carrier Start/Stop Transient	94
C5.	Output Noise During Silence	96

C6. Analog Rate of Change	97
C7. Device Receive Impedance Data	98
C8. Send Impedance – Low Impedance and Secondary Devices.....	102
C9. Noise Sensitivity Tests.....	104
C10. Carrier Detect Level.....	105
Appendix D. revision history	106
D1. Changes from Revision 2.1 to 2.2.....	106
D2. Changes from Revision 2.0 to 2.1.....	106
D3. Changes from Revision 1.1 to 2.0.....	107
